Gabriel Crowell

210-381-6495 | gacrok@gmail.com | mistyleo12.github.io | LinkedIn | Spanish (Fluent)

Senior software engineer with 6+ years building high-impact products across health tech and privacy. Holds a B.S. in Computer Science and B.A. in Global Health with a focus on climate change's effects on human health — bringing domain depth to mission-driven engineering roles. Seeking Senior and Staff engineering roles where technical depth and systems thinking can have meaningful impact.

SKILLS

Proficient: JavaScript/TypeScript, Node.js, Python, PostgreSQL, Neo4j, AWS, React, Git, MongoDB
Familiar: Rust, C++, Docker, Terraform, Redis, Vue, Java, Jest, Jenkins, Grafana, CI/CD

WORK EXPERIENCE

Paraglide (EMS Platform) – Founder *October 2025 – Present*

- Founded and built a regulated health-data platform for EMS agencies, owning product, architecture and go-to-market.
- Built an AI document-intake feature on AWS Bedrock that turns a photo of a paper form into structured JSON for Paraglide's electronic forms, so agencies can digitize paper records without retyping them.
- Designed an offline-first system for low-connectivity field work: forms encrypted on-device and synced on reconnect, built on Node, React, Rust, and AWS with HIPAA and NEMSIS compliant data.
- Interviewed EMTs, in-house medical staff, and agency supervisors to map field documentation workflows before writing code.

Osano – Senior Software Engineer (Remote) *Jan 2022 – September 2026*

- Designed, built, and owned a real-time event-driven notification service for Slack and Microsoft Teams, consolidating 15+ notification paths into a single service.
- Led a cross-functional team to build a static site manager that publishes privacy documents at scale, using AWS SQS and S3; integrated with 3 other Osano products to drive cross-platform growth.
- Migrated graph database from AWS Neptune to PostgreSQL, cutting query latency by 40% and meaningfully reducing cloud infrastructure costs by ~$150-200k per year.
- Refactored long-running ECS jobs to an event-driven architecture, reducing nightly job runtime by ~80%.
- Architected and shipped an automated assessment builder enabling customers to evaluate 3rd-party vendor privacy/security risk across multiple jurisdictions — now a core product offering.
- Co-developed a privacy score product used by customers to track vendor risk and breach alerts.

Human Care Systems – Full-Stack Software Engineer (Remote) *Jun 2020 – Jan 2022*

- Built a TypeScript-based integration system that onboarded 50,000+ new patients.
- Developed and deployed 5 web apps (MEVN stack) supporting new patient enrollments, patient consents, and 30+ medical provider consents — reducing enrollment time and cost.
- Integrated AWS Lex sentiment analysis into a HIPAA-compliant CRM to enable more dynamic, responsive SMS communication between practitioners and patients.
- Launched bi-weekly virtual learning lunches to cross-train engineers and standardize best practices.

Medspoke – Software Engineer Intern *May 2017 – Aug 2017 San Antonio, TX*

- Built the company website, Python automation scripts, and data pipelines to support early-stage operations and model prototyping.

WISER (Volunteer) – Programming Teacher *Jun 2018 – Jul 2018 Muhuru Bay, Kenya*

- Taught Python programming to students at an all-girls school in rural Kenya; collaborated with a team to provide reproductive health education reaching 1,000+ students.

Honduras Patient Notifier & Manager

- Led an agile team to build a patient scheduling and notification app for a remote clinic in Roatán, Honduras — Node.js/MongoDB backend, Twilio SMS, Docker + Jenkins CI/CD.

EDUCATION

Duke University – B.S. Computer Science & B.A. Global Health *Graduated May 2020*

- Global Health focus: climate change impacts on human health — food security, vector-borne disease, displacement, and health system resilience.
- Relevant CS coursework: Data Structures & Algorithms, Graph Algorithms, Databases, Data Science, Computer Architecture, Mobile Dev, Smart Contract Dev, Linear Algebra, Probability & Statistics.
